

E-Solutions Design Partner Pilot

Board-ready variance memos in hours — with reproducible numbers and an audit trail.

The problem

Your finance team spends 8–15 hours every month pulling GL data, comparing actuals to budget in spreadsheets, writing variance explanations, and formatting a memo for the board. The process is manual, error-prone, and impossible to audit three months later.

What we deliver

E-Solutions produces your monthly board variance memo as a managed service. Each cycle:

1. **Your controller uploads** the GL export and budget file (CSV or Excel, same files you already pull from QuickBooks, Xero, or NetSuite)
2. **We validate** the data against your chart of accounts and flag any issues — nothing is analyzed until validation passes
3. **We produce** a draft variance memo: actuals vs. budget across all account categories, materiality flagging, narrative explanations for key drivers, and a KPI summary
4. **A finance QA reviewer checks** every memo for accuracy and clarity before it reaches you
5. **You review and approve** the final memo (or request revisions)
6. **We deliver** the board-ready PDF via secure portal and encrypted email

Every memo includes a checkpoint ID that ties the output to the exact source data, validation results, and review log. You can reproduce any memo at any time.

Turnaround: Under 48 hours from validated upload.

What you provide

Item	Format	Frequency
General ledger export	CSV or Excel (trial balance or transaction detail)	Monthly
Budget file	CSV or Excel (annual budget by month)	Once at setup, updated if revised
Chart of accounts	Your account list (for initial COA mapping)	Once at setup
Feedback	30-minute call	Weekly during pilot
Case study permission	Anonymized — no company name or financials without your approval	Once

Pilot timeline

Phase	Duration	What happens
Kickoff	Days 1–3	Data requirements walkthrough, COA mapping, access setup
Test run	Days 4–14	First memo produced from sample or prior-month data; format review with your team
Cycle 1	Month 1	First live monthly memo from real data
Cycle 2	Month 2	Second memo with refinements from Cycle 1 feedback
Cycle 3	Month 3	Third memo; pilot review and continuation decision

Total duration: 90 days. **Go-live target:** First real memo within 2 weeks of kickoff.

Who this is for

- Seed to Series B SaaS and services companies
- 20–250 employees, \$1M–\$30M ARR
- Finance team of 1–3 people
- Using QuickBooks Online, Xero, or NetSuite
- Producing monthly board or investor reporting packages

Pilot pricing

Design partner rate	\$1,500/month for the 90-day pilot (50% discount from Starter tier)
Includes	Up to 3 memos/month, 48h turnaround SLA, human QA review, secure portal delivery
After pilot	Standard Starter pricing (\$3K–\$4K/month) if you choose to continue
Setup fees	None
Commitment	90 days. No auto-renewal. No penalty for stopping.

Why this is low-risk

- **See the output before committing.** We produce a sample memo from anonymized data before you provide real financials.
- **Human review on every memo.** AI assists with analysis; a human reviewer verifies accuracy before delivery.
- **Your data stays isolated.** No cross-client data access, ever. Enforced by architecture, not policy.
- **Full audit trail.** Every memo has a checkpoint ID tying it to source data, validation, and review log.
- **No lock-in.** 90 days, no auto-renewal, no penalty for stopping. If it does not save time and improve quality, you walk away.
- **Data Processing Agreement available.** We handle your financial data under clear contractual terms.

What is not included

- Multi-entity consolidation or intercompany elimination
- Direct integrations to your accounting system (manual upload during pilot; integrations planned for post-pilot)
- Forecasting, budgeting, or cash flow analysis
- Real-time dashboards or continuous monitoring
- SLA below 48 hours (available in Pro tier)
- Custom report templates (standard format during pilot; customization in Cycle 2+ based on feedback)

How we measure success

At the end of 90 days, we evaluate together:

Criterion	Target
Time savings	60%+ reduction in your team's monthly memo effort
Quality	Memo meets or exceeds your board's current standard
Reliability	Memos delivered within 48h SLA in every cycle
Auditability	Any number traceable to source data via checkpoint ID
Willingness to continue	You see enough value to continue at standard pricing

Next step: Schedule a 30-minute call. We'll walk through a sample memo, discuss your data setup, and determine fit. If the sample meets your standard, we can have you live within two weeks.
